

PRACTICE OVER. ENTER THE NEXT LEVEL

Obstacles are the footprints of success
And when success is the only option, come prepared to face the challenges

The challenges faced by SMEs today are manifold. With ever rising competition at all levels, widening of free trade & globalization, it is only the tough that will stand the test of time & win the final race

Disciplined and systematic business approach with best practices: Modern-day business is all about maintaining tight discipline & following an organized work process. Adherence to top quality standards along with best practices, would go a long way in establishing business superiority.

Ensuring accountability & responsibility: Clearly defined functional areas, along with a fool-proof process checking device to ensure accountability is something that is imperative to any business house. All systems must be tailored so that they can generate clear-cut responsibilities.

Measuring business performance: The world has acknowledged the importance of performance management. Corporate health needs to be monitored on a periodical basis with business intelligence functionality providing a reality check.

Business Process Automation: Absolutely critical for achieving optimum efficiency in business operations by cutting out human errors & duplication of work processes.

Real-time collaboration across departments, across locations: Making the right decision at the right time is the Mantra for any successful business house today. For achieving this, financial data consolidation, production & inventory, sales tracking & other critical business information need to be at the fingertips, just a mouse-click away.

Just-in-time inventory: One of the most ignored areas, yet the most important. Material requirement planning is used to eliminate dead stock, inventory loss and ensure uninterrupted production.

Could the traditional ERP package be a solution?
NO. Till now the regular, much-hyped ERP was the automatic choice. But with its expensive customization & never-ending implementation process, it is a proposition that affects the bottom line adversely.

Kickstart to a new beginning
A goal properly set is halfway reached

Be the first one off the blocks

Endless waits, missed deadlines, never ending customization – sure signs of a business saddled with the traditional ERP system. It is the time you put your business on the fast track of success.

Switch to smERP (Small and Medium Enterprise Resource Planning) – a well packaged, no-frill, ready-to-use ERP solution, that understands the exact needs of your business. A best-of-the-breed package that integrates the core functions of a business unit like finance, sales, order processing, procurement, material requirement planning, inventory and resource management, etc while cutting out the unnecessary. Specific business needs met with alacrity, quality maintained at reduced costs, implementation on fixed timelines, a well defined user training and support strategy. No wonder, smERP is a customer's delight. Stay ahead in the race. As they say, well begun is half done.

Leap ahead to a new future

Adversity causes some men to break; others to break records

Put all hurdles behind you

Introducing EXPAND smERP. Your ready-to-use, no-frills, super efficient partner capable of putting an end to all your business blues.

Custom-created to suit Indian markets, work environs & other core requirements, EXPAND smERP is also inexpensive & easy-to-use. EXPAND's architecture enables fast & flexible implementation & deployment strategy. Being a highly configurable & scalable business solution, it delivers a powerful functionality needed to gain a sustainable competitive advantage. It also helps in transcending organizational barriers & extend business processes to partners, suppliers & customers.

EXPAND has been researched and engineered by a team of highly skilled professionals at eDominator, a premier business applications development & consulting house. With over a decade of technology & domain experiences, the team boasts of Microsoft Most Valuable Professionals, Microsoft Certified Solution Developers, Trainers & Chartered Accountants who have encapsulated their know-how & best practices into a state-of-the-art business solution - EXPAND smERP.

Your joint venture with success has just begun

Excellence is all about getting the basics right

Web-based technology

A true web-based system that can be centrally deployed at customer's HO locally and can be connected to other sites via Internet, VPN or Data card. The system can also be deployed with internet hosting service provider connecting all the locations via the internet.

Microsoft SQL Server

In RDBMS, Microsoft SQL Server is the most trusted, productive, and intelligent database server which is enterprise-ready. It is the backbone of EXPAND architecture and provides the highest levels of security, reliability, and scalability for your business-critical applications. Some of the large companies in the world rely on SQL Server including Citigroup, Hitachi, NASDAQ Stock Market, Inc., GE HEALTHCARE, etc.

Deployment

With multiple deployment models from real time, centralized or synchronised, EXPAND smERP is surely a winner. Whatever your business demands be, whatever your infrastructure be, EXPAND's deployment model fits the budget of every small and medium enterprise with lowest IT overhead and lowest recurring cost. Meet us to know more.

EXPAND User Interface

Human Centered User Interface Design, with excellent navigational design which gives visually stunning user experiences. The software is smarter and context aware (Feels, thinks and acts), quickly adoptable because of its interactivity. EXPAND easily establishes user trust and promise fantastic solution for your business demands.

Microsoft .NET Technology

The .NET Framework is Revolutionary Technology. EXPAND builds on this technology, provides seamless and secure communication. The platform enables integration across softwares, services, and devices. More than 51% of Fortune 1000 sites use Microsoft.Net.

Some are born to lead, others follow

Time to take complete control.

EXPAND's quick implementation and deployment process, user-friendly attributes and affordability will allow you to take complete charge of your business & lead from the front

The EXPAND EDGE

- Online real time deployment & offline synchronization model
- Integrated SMS and eMail on important business checks and events
- Integrated eMail client with inbound and outbound email monitoring
- Human centric user interface: easy to understand and navigate
- Multilingual support
- True web based technology
- Integrated help and instant remote support
- Tasks and appointment management

Lead the pack. Always

EXPAND provides you that extra edge to stay ahead

Traditional ERP	EXPAND smERP
SRS and GAP analysis followed by customizations are never ending and involve extreme business risk	Pre-configured and pre-tested versions are more effective in terms of cost & time and involves no risk
Either the organization has to force the system or go in for costly and endless customization to fill gaps	Clearly addresses the business problems, working environment and literacy issues of SME segment
Training resources on a customized solution is an additional expense and time consuming proposition	EXPAND smERP is equipped with a 2 week pre-defined learning model which is result oriented and cost effective
Need to hire technology specialists for a lifetime to maintain & support the system	Relieves a small business of hiring a specialist and instead educate in house talents
Highly sophisticated and difficult to operate	Simple and user friendly powered by a human centered design
Expensive and huge cost of maintenance - directly affects the bottom line	Cost-effective and affordable resulting in low Total Cost of Ownership

The secret to winning is constant, consistent management

Be trained to win

eDominer Systems, pioneers in specialized corporate training. Known for delivering top notch technology training worldwide, Peopleware India has trained more than 5000 professionals from top rank blue chip to mid-size companies. Some key clients include Siemens, Bosch, Royal Bank of Scotland, TATA, IBM, HP, Accenture, Wipro, Microsoft and Infosys.

Peopleware India's innovative training methodology ensures smooth migration from your legacy systems to the latest cutting-edge technologies. Through direct involvement and personal interaction, Peopleware India's instructor-led delivery ensures that acceptability and computing fluency is developed amongst the users so that one gets maximum return on technology investment, from day one.

eDominer – A pillar of support. Always.

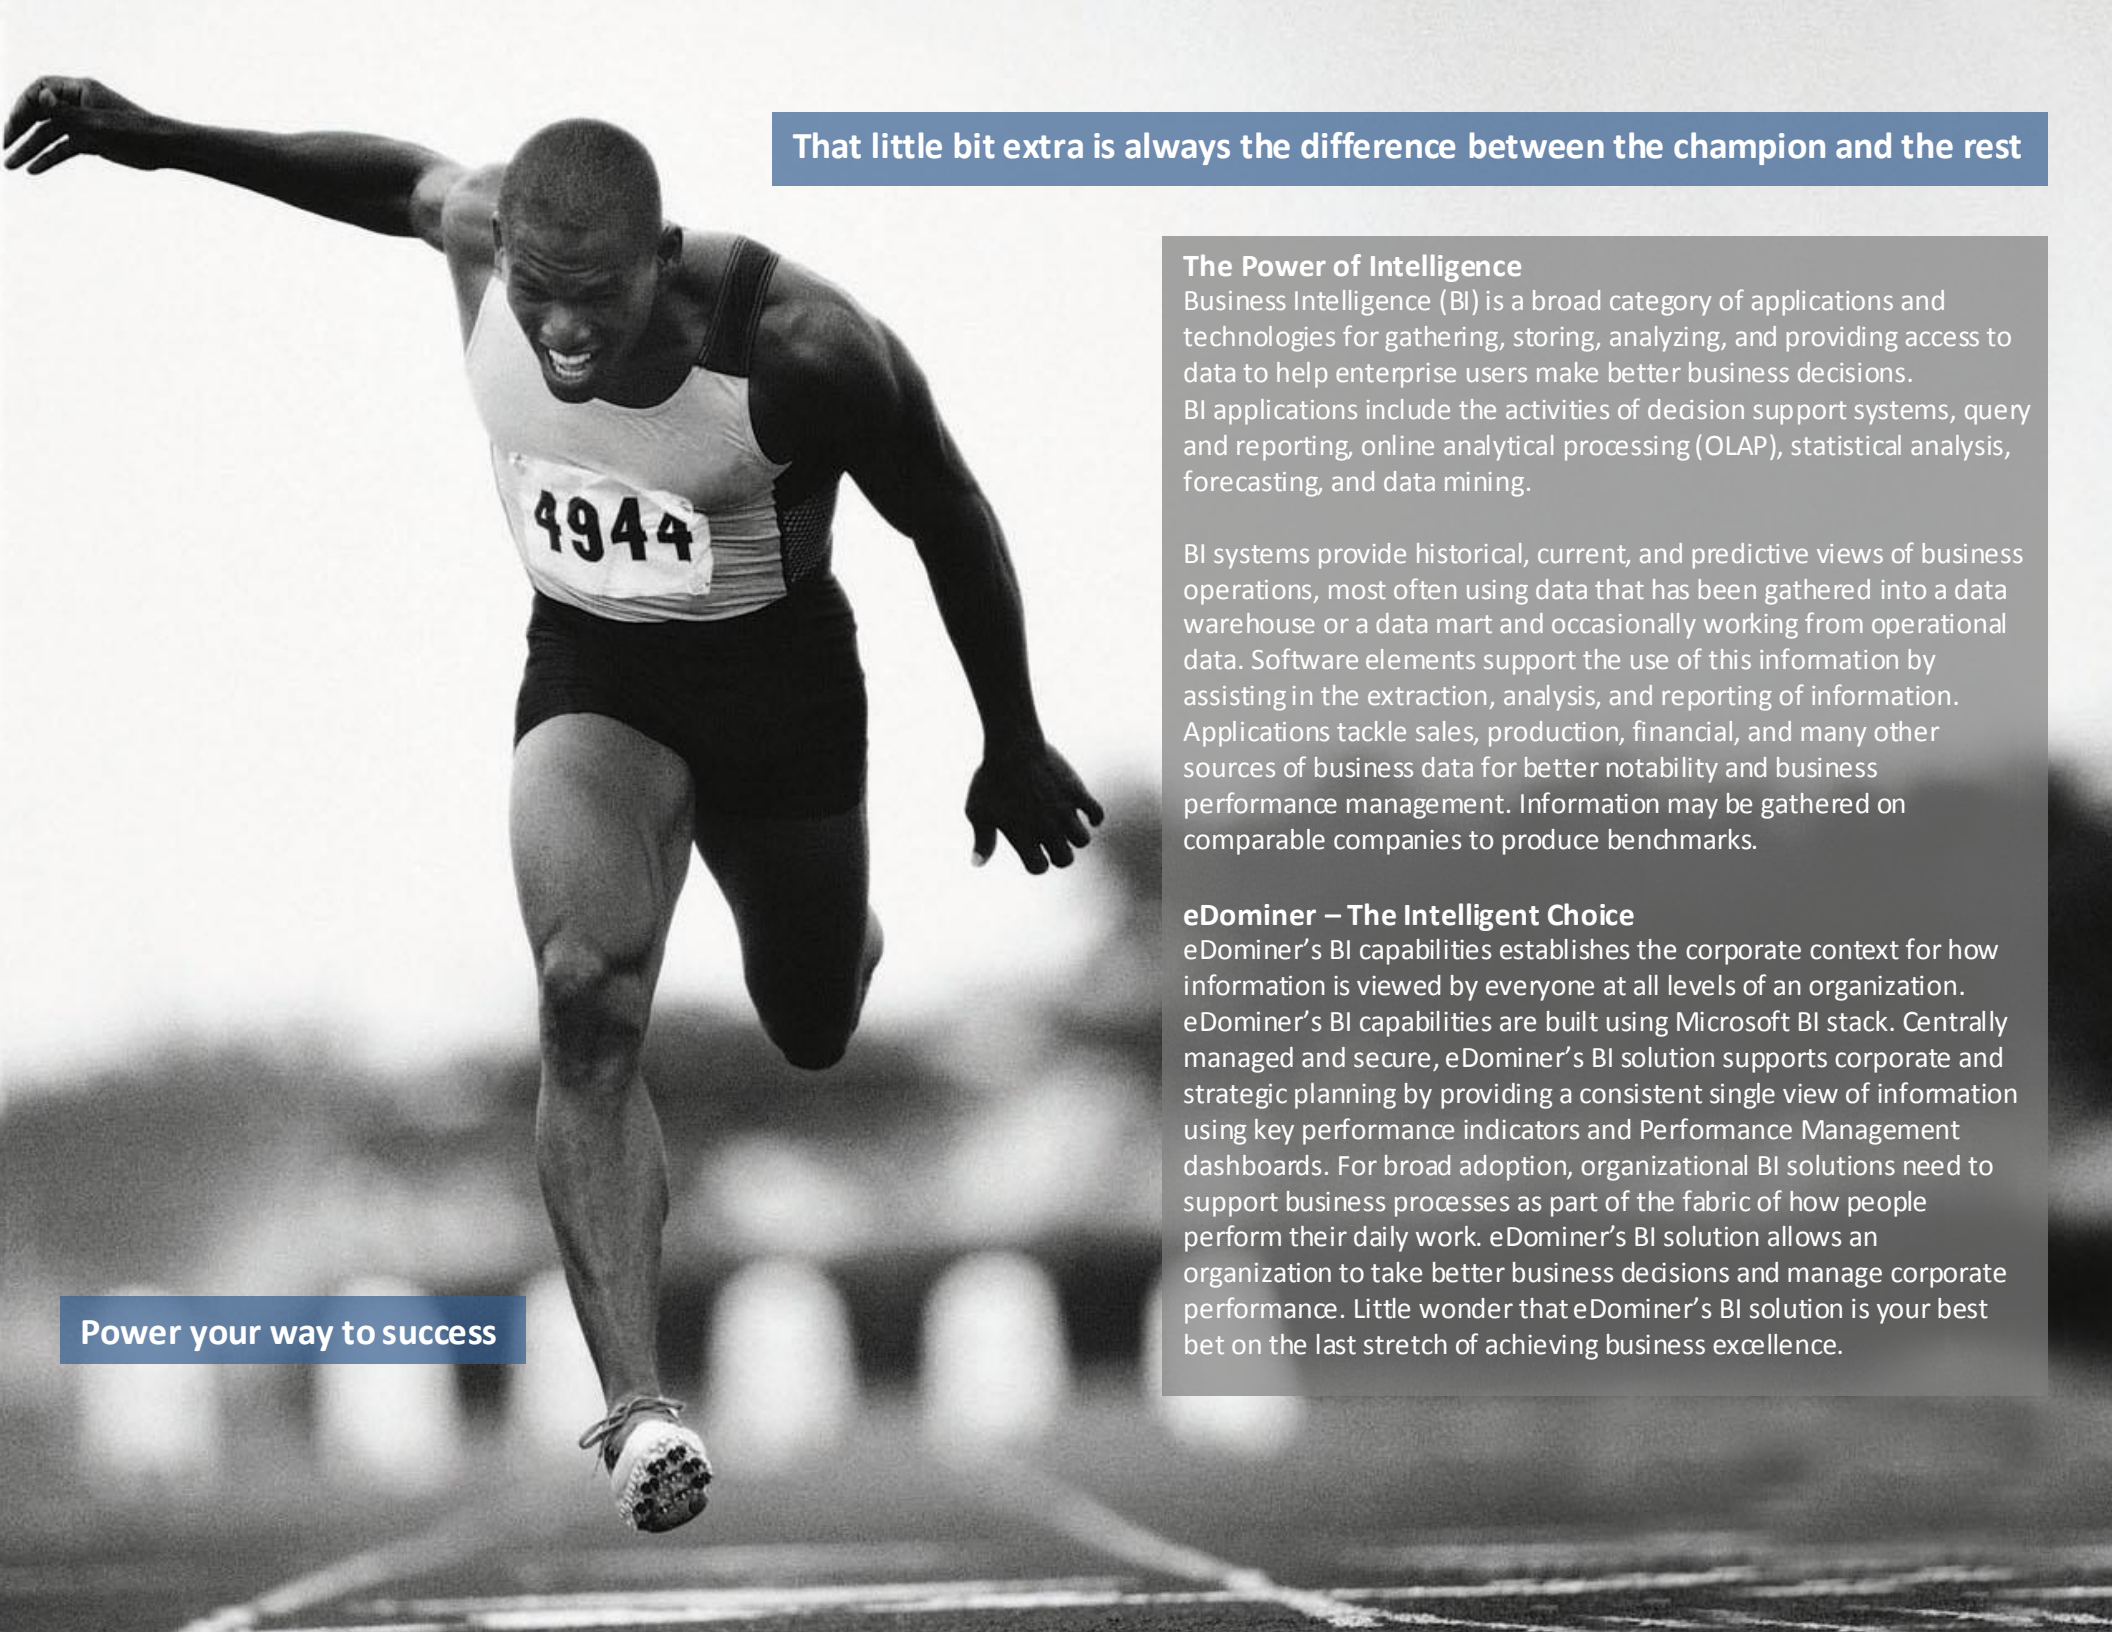

eDominer's holistic support system is designed in a manner that companies get 360 degree support regardless of their size & budget.

Remote desktop, telephonic support, online chat supports, backed by prompt & regular client visits ensure that help is available anywhere, anytime, 24/7.

A highly trained support team, specialized in interactive processes, covering wide issues like configuration, workflows, customization & development, ensure world-class service back-up during AMC and Hand Holding operations.

Gear up to be the best

That little bit extra is always the difference between the champion and the rest

Power your way to success

The Power of Intelligence

Business Intelligence (BI) is a broad category of applications and technologies for gathering, storing, analyzing, and providing access to data to help enterprise users make better business decisions.

BI applications include the activities of decision support systems, query and reporting, online analytical processing (OLAP), statistical analysis, forecasting, and data mining.

BI systems provide historical, current, and predictive views of business operations, most often using data that has been gathered into a data warehouse or a data mart and occasionally working from operational data. Software elements support the use of this information by assisting in the extraction, analysis, and reporting of information. Applications tackle sales, production, financial, and many other sources of business data for better notability and business performance management. Information may be gathered on comparable companies to produce benchmarks.

eDominer – The Intelligent Choice

eDominer's BI capabilities establishes the corporate context for how information is viewed by everyone at all levels of an organization. eDominer's BI capabilities are built using Microsoft BI stack. Centrally managed and secure, eDominer's BI solution supports corporate and strategic planning by providing a consistent single view of information using key performance indicators and Performance Management dashboards. For broad adoption, organizational BI solutions need to support business processes as part of the fabric of how people perform their daily work. eDominer's BI solution allows an organization to take better business decisions and manage corporate performance. Little wonder that eDominer's BI solution is your best bet on the last stretch of achieving business excellence.
